

IVO Voice alarm system

KSSO – Fiber optic network module

KSSO converters are designed to connect VA IVO rack cabinets in a network system using fiber optic. KSSO module parameters enable transparent and simultaneous transmission of several high-quality audio streams without any delay. KSSO modules allow network connection in loop configuration.

Chosen technical data

Maximum distance between two rack cabinets in a network configuration	20 km
Transmission data format	4x RS232/485
Internal termination	+
Fiber optic type	9/125µm, 62,5/125µm
Fiber optic connector type	SC
Installation	DIN (TS35)
Power supply	20..60 V DC
Dimension	103x77x53 mm
